

How to Draw a Moonbot

Instructions: Ask your guardian for a ruler, something round, paper, and a pencil.

step 1

With something round, draw a circle.

Now use the ruler to divide the circle into quarters.
Draw lightly!

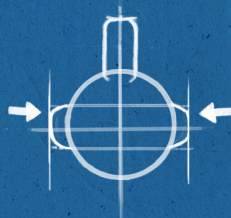

step 2

Draw a cylinder on top of the head.

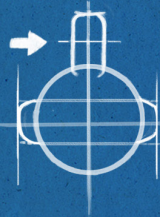

step 3

Draw two spheres on each side of the head.

step 4

Divide the top cylinder into halves.

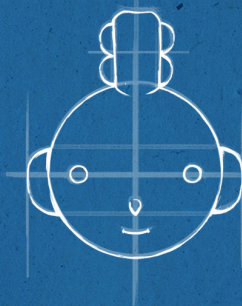

Draw two spheres on each side of the cylinder.

step 5

Round the edges of all the cylinders. Along the dividing lines, add eyes, nose, and most importantly, the smile.

To make the moonbot's head stand out, take a marker or dark pencil and draw over the face.

Now you know how to draw a moonbot's head!

Now draw the rest of the moonbot.
